### Summary of Change Requested:

At the Association race, I think it could be good to clarify the rule by writing that the box has to have her "bottom" on the lid of the previous one. Or may a box be put on the side till the next rider arrives? What about the last one? I ask it because I saw a rider putting the second box on the side by accident and the second riders re-put it on its bottom. Should it be accepted?.

- Benoit Snoek -

### Current Rule Book Wording:

#### Team

Rider 1 starts with the container marked B and places it on the bin on the centre line, rides to the bin at the changeover end, collects the next container, returns to stack this on top of the previous container and then rides to cross the Start/Finish line. Rider 2 rides to the changeover end, collects the next container, places it on top of the stack on the centre bin and crosses the Start/Finish line. Riders 3 and 4 complete the course in the same way. At the end of the race, the stack in the centre should read M (green), G (yellow), A (blue), G (red), B (white) with M at the top.

#### Pairs

Rider 1 rides to the bin on the centre line, places the container upon it, rides to the changeover line, collects the next container and returns to stack this on the bin on the centre line. The remaining three containers are collected singly by either rider, provided that each rider collects at least one container. At the end of the race, the stack in the centre should read M (green), G (yellow), A (blue), G (red), B (white) from top to bottom.

#### Individual

The rider rides to the first bin, places the container with the letter G on it onto the bin, rides to the changeover end, collects the next container and stacks this on top of the first container on the centre line bin. The rider collects containers, singly, stacking them on the centre line bin until all four containers are stacked and then crosses the finish line. If containers are upset or fall over, they must be re-stacked immediately, but not necessarily in the correct order. However, when the rider crosses the Start/Finish line, the stack of containers must read M (green), G (yellow), A (blue), G (red) from top to bottom.

### Suggested New Rule Book Wording:

#### Team

Rider 1 starts with the container marked B and places it on the bin on the centre line, rides to the bin at the changeover end, collects the next container, returns to stack this on top of the previous container and then rides to cross the Start/Finish line. Rider 2 rides to the changeover end, collects the next container, places it on top of the stack on the centre bin and crosses the Start/Finish line. Riders 3 and 4 complete the course in the same way. At the end of the race, the stack in the centre should read M (green), G (yellow), A (blue), G (red), B (white) with M at the top. Boxes should be stacked by placing the bottom of one box onto the top of another and not on their side.

#### Pairs

Rider 1 rides to the bin on the centre line, places the container upon it, rides to the changeover line, collects the

next container and returns to stack this on the bin on the centre line. The remaining three containers are collected singly by either rider, provided that each rider collects at least one container. At the end of the race, the stack in the centre should read M (green), G (yellow), A (blue), G (red), B (white) from top to bottom. Boxes should be stacked by placing the bottom of one box onto the top of another and not on their side.

Individual

The rider rides to the first bin, places the container with the letter G on it onto the bin, rides to the changeover end, collects the next container and stacks this on top of the first container on the centre line bin. The rider collects containers, singly, stacking them on the centre line bin until all four containers are stacked and then crosses the finish line. If containers are upset or fall over, they must be re-stacked immediately, but not necessarily in the correct order. However, when the rider crosses the Start/Finish line, the stack of containers must read M (green), G (yellow), A (blue), G (red) from top to bottom. Boxes should be stacked by placing the bottom of one box onto the top of another and not on their side.

Reason for Change Request:

To make absolutely clear what is required

Actual Adopted New Rule Book Wording:

Team

Rider 1 starts with the container marked B and places it on the bin on the centre line, rides to the bin at the changeover end, collects the next container, returns to stack this on top of the previous container and then rides to cross the Start/Finish line. Rider 2 rides to the changeover end, collects the next container, places it on top of the stack on the centre bin and crosses the Start/Finish line. Riders 3 and 4 complete the course in the same way. At the end of the race, the stack in the centre should read M (green), G (yellow), A (blue), G (red), B (white) with M at the top. Boxes should be stacked by placing the bottom of one box onto the top of another and not on their side.

Pairs

Rider 1 rides to the bin on the centre line, places the container upon it, rides to the changeover line, collects the next container and returns to stack this on the bin on the centre line. The remaining three containers are collected singly by either rider, provided that each rider collects at least one container. At the end of the race, the stack in the centre should read M (green), G (yellow), A (blue), G (red), B (white) from top to bottom. Boxes should be stacked by placing the bottom of one box onto the top of another and not on their side.

Individual

The rider rides to the first bin, places the container with the letter G on it onto the bin, rides to the changeover end, collects the next container and stacks this on top of the first container on the centre line bin. The rider collects containers, singly, stacking them on the centre line bin until all four containers are stacked and then crosses the finish line. If containers are upset or fall over, they must be re-stacked immediately, but not necessarily in the correct order. However, when the rider crosses the Start/Finish line, the stack of containers must read M (green), G (yellow), A (blue), G (red) from top to bottom. Boxes should be stacked by placing the bottom of one box onto the top of another and not on their side.

Reason for Decision:

Removes potential doubt from the rule
