

International Mounted Games Association Rules Committee

Rule Change Request Document

Name:	Jens Martin
-------	--------------------

Country:	IMGA Rules Committee
----------	-----------------------------

Summary of Change Requested:

Fourth of 5 change requests regarding equipment specifications following experiences with the new equipment specifications this season.

This change comes originally from Pony Materials.

Current Rule Book Wording:

Baton

A length of wood or plastic or other strong composite material 30cm long with a round cross section, 4cm diameter.

Suggested New Rule Book Wording:

Not provided

Reason for Change Request:

- The baton: you ask a baton of 4 cm of large, i think nobody has ever play with this type of baton. 4 cm is very large and strong, the same as the tire, for the kid it's very difficult to catch him, and to ride in the same time. I think 3 cm like the bending pole it's ok.

For Internal Use Only:

Result:	Change Accepted
---------	-----------------

Actual Adopted New Rule Book Wording:

Baton A length of wood or plastic or other strong composite material 30cm long with a round cross section, diameter between 2.5cm and 3.5cm.

Reason for Decision:

Seeing as Baton's are generally nothing more than offcuts from bending poles, it seems logical to align the measurements with those of the bending poles.

Implementation Date:	1 st January 2015
