

International Mounted Games Association Rules Committee

Rule Change Request Document

Name:	Iain Hopkins
-------	--------------

Country:	IMGA Rules Committee
----------	----------------------

Summary of Change Requested:

The bins we use all across Europe at any major championship are 58.1 cm tall they are the only bin on the market made of the tough rubbery plastic which makes them near unbreakable where so many bins in previous years just shatter.

But the rule book says between 60cm and 70 cm. No one had even commented until this year when they were measured so you end up with 2 options you put a thick base on them to get them up to the size or we change the rule to 58cm to 70cm to ensure the best equipment for the job is use.

Current Rule Book Wording:

Bins are made of heavy duty rubber or plastic, round and between 60cm and 70cm high, with the open end having an internal diameter between 46cm and 51cm, and the closed end an external diameter between 37.5cm and 45.5cm. The handles may be removed.

Suggested New Rule Book Wording:

Bins are made of heavy duty rubber or plastic, round and between 58cm and 70cm high, with the open end having an internal diameter between 46cm and 51cm, and the closed end an external diameter between 37.5cm and 45.5cm. The handles may be removed.

Reason for Change Request:

As above.

For Internal Use Only:
